

Are you a startup solving for **climate** and Pollution Reduction?

We help you succeed.

Accelerate your startup with **LowCarbon Earth**

[Apply Now](#)

The Ministry of Agriculture and Livestock is happy to support Low Carbon Earth.

If you believe you possess an exceptional climate solution and your application is compelling, this is your chance to apply!

Low Carbon Earth is an accelerator designed by the UN Environment Programme and Massive Earth Foundation.

It connects high-potential sustainability startups with the resources and mentorship needed to craft an impactful value proposition, build traction, connect with investors, and tap funding.

Gain access to high-quality workshops, 1-1 mentoring, and support from diverse entrepreneurs and industry experts.

Get equity-free support with product development, go-to-market strategies, and investment readiness.

Access the United Nations Environment Programme's worldwide network of industry experts.

Startup finalists will get to pitch their startups in Dubai during COP28!!

Applications for Low Carbon Earth 2023 are now Live ! Submit yours NOW!
